

Syntex IMPACT Enterprise® to be showcased at NPRA's National Safety Conference

Syntex Management Systems Founder to Co-Present alongside Exxon

Houston, TX (March 29, 2006) --- Syntex Management Systems is pleased to announce that IMPACT Enterprise® will be showcased at NPRA's National Safety Conference during the Track One Workshop Sessions May 3-4, 2006 at the Renaissance Austin Hotel in Austin, TX. "Implementation of a Management System Execution Framework," presented by Scott McGhee of Exxon and co-presented by Syntex founder, Joe Stough will highlight how IMPACT Enterprise® is strengthening Exxon's execution of various Operations Integrity Management System (OIMS) elements. Attendees participating in this track will be educated on the features and benefits of applying a software application toolset to reduce costs incurred from loss events (injuries, spills, asset damage, operation shut-downs, etc.) on a global scale.

The NPRA National Safety Conference is held annually to address and offer resolutions to today's health and safety challenges and issues affecting refineries and petrochemical plants throughout the world. Leading industry experts share valuable insights to promote safety and accident prevention through these presentations and workshops. "This Conference provides an excellent forum for our solution as NPRA members are dedicated to continuous improvement in the safety performance of their processing facilities and products," said Joe Stough, Founder and Executive VP of Product Strategy.

IMPACT Enterprise®, a powerful, comprehensive Enterprise Risk Management solution that helps companies dramatically improve Quality, Health, Safety and Environmental (QHSE) performance will be among the products that will be exhibited. Today, global industry leaders deploy IMPACT Enterprise worldwide to reduce losses and improve performance by automating regulatory reporting and enabling in-depth analysis of key QHSE metrics at site and enterprise levels. The software solution seamlessly integrates Incident, Near Miss and Investigation Tracking with critical proactive processes such as Corrective Action and Assessment Management, knowledge sharing, and comprehensive analysis and reporting for effective course correction and continual improvement.

Syntex will have an exhibit at the conference and will be demonstrating the solution to attendees of the conference. If you would like learn how Syntex can help your organization manage your QHSE initiatives, please contact us at info@syntexsolutions.com to schedule a one-on-one product demonstration at the Syntex booths # 4 and #5 or to receive a product preview before the conference.

About NPRA

NPRA speaks for the petrochemical and refining industries on issues important to their business. NPRA seeks to inform policymakers and the public on how the petrochemical and refining industries help improve their lives, strengthen the economy, protect the environment and promote national security. NPRA members include more than 450 companies, including virtually all U.S. refiners and petrochemical manufacturers. More information on NPRA may be found at www.npradc.org.
