

FOR IMMEDIATE RELEASE

Hanover Compressor Company is LIVE on Syntex IMPACT Enterprise in Broken Arrow, OK

Houston, Texas (November 1, 2006) – Syntex Management Systems, Inc. today announced the successful “go-live” of Syntex’s IMPACT Enterprise® Software implementation at Hanover Compressor Company.

IMPACT Enterprise applies enterprise-level, web-based technology to integrate a central risk mitigation action item program with both reactive and proactive business processes for risk discovery – establishing a platform for continuous improvement of Enterprise Risk Management (ERM) activities.

In the QHSE area, IMPACT Enterprise® provides a user-friendly system that automatically generates notifications to the appropriate responsible persons for injury, illness or environmental incidents, near misses and hazard observations. IMPACT allows the user to create and assign follow-up action items and reminders that ensure closure by reducing risk, thus providing a safer work environment.

Implementation of IMPACT Enterprise® will enable Hanover to connect and automate end-to-end risk management processes and provide insight into identifying and solving safety and environmental issues before they result in loss. “We believe the new IMPACT Enterprise deployment will help us achieve Service Excellence at Hanover. It provides a tool to focus on action items to help reduce risks in manufacturing, operations, QHSE, Human Resources and other areas of our core business,” said Steve Muck, Vice President, Global Human Resources and HSE, Hanover Compressor Company. IMPACT Enterprise® is designed to empower employees to report, prioritize and mitigate risks associated with people, equipment and environment allowing for greater visibility into the operational processes.

About Syntex Management Systems, Inc.

Syntex Management Systems, Inc. designs, develops, and delivers commercial software solutions for Operational and Enterprise Risk Management (ERM) in multiple industries. Syntex enables organizations around the world to reduce their exposure to loss while implementing continuous process improvement to create an annually renewable impact on their bottom line. Through continuously improving the execution of enterprise-wide management systems, our customers improve their performance across operational, quality, compliance, auditing, reputation, environmental, health, safety and security management functions. As a result, Syntex has unequaled expertise in making our customers successful and protecting their reputations by turning continuous improvement strategies into repeatable practices and policies using the power of our enterprise class software solutions.
